

The Learning Lane, LLC

The Learning Lane is an Applied Behavior Analysis Preschool Center. The center specializes in working with children with autism and language delays. The school is open to children between the ages of 2 to 7. We encourage typically developing children to enroll in the center, as this will benefit all children immensely from shared growth and learning experiences. Inclusion provides a challenging, enlightening, and motivating environment for all children.

Under the direction of Jennifer Crawford, M.Ed BCABA, The Learning Lane offers a multidisciplinary staff, which provides services in the areas of behavior, academics, and language development. Children rotate through three different settings a day. Pre-academics in which the children learn pre-classroom skills to prepare them for a school setting. Acquisition class which the child works one on one on new skills along with some independent skill to prepare them for pre-academic and social class. Social class provides the children an opportunity to play and learn from one another. Each child also receives their own individual plan tailored to their needs. We welcome you to The Learning Lane and hope to make every child feel triumphant in some way each day.
